| 25. Industrial Hygiene; Sociology | 50. Zoology |

Privately published under the auspices of the

EXECUTIVE COMMITTEE OF THE
FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

MEDICAL LITERATURE TO CHINA

At the request of the American Bureau for Medical Aid to China, Medico-film Service of the Army Medical Library of Washington is now making microfilm copies of medical literature for 14 centers in Free China. This includes copies of the original contributions contained in more than 60 periodicals devoted to medical and closely related sciences.

Although Medico-film Service was designed particularly for aiding research workers in the United States to obtain the original literature not generally accessible in other than the principal centers of research, its services have been extended to many workers in far places. The Hebrew University in Jerusalem, the American University of Beirut, Syria, and the Library of the University of Algiers are examples of centers in the war restricted areas having need of medical literature which can be supplied as microfilm copies. The service is also being extended to many medical institutions of Central and South America.

A request was recently received from the Director of the Imperial Bureau of Animal Health, Surrey, England, for microfilm copies of literature not otherwise accessible to this institution.

In connection with the War emergency, the Current List of Medical Literature is being sent to the General Hospitals of the Army and the more important station hospitals of the Navy and microfilm copies of papers which are not available to these hospitals will be made by Medico-film Service without charge.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year.
